What are the critical control points for food safety

Hazard description: Is there a prerequisite operation that can control this hazard? NO YES ---- This threat is not a Critical Control Point. Would a loss of control at this point result in a realistic risk of illness or injury? **YES** NO — → This threat is not a Critical Control Point. Is there a later step at which this hazard can is under your control or can be controlled? NO YES ----- Not a Critical Control Point - move to next step. Is this point designed to eliminate the hazard or reduce the hazard (incl reducing the hazard to an acceptable risk level)? → Not a necessary CCP - modify the step, YES process or product.

The analyzed threat is either a Critical Control

Point or an Operational Prerequisite.
